Welcome to HANHUI!

We are an experienced plastic packaging container manufacturer in China. Our factory is located in Pingshan high-technology development zone, Shenzhen city, China. Since its establishment in 2008, we have rapidly grown into an excellent manufacturer in China. Our packaging solutions and products are widely used in Cosmetics, Hotel Supply & Daily Chemicals, Medicine and Health-Care products, Home Cleansing products and Festival Decoration.

Based plenty of high accuracy machines and molds making, we provide qualified solutions for every packaging project with excellent item. Our rich experience is the guarantee of high quality products and services to meet different customer needs, and our capable team ensures fast response and cargos delivery. In 2019, we've opened the second manufacturing base in Huizhou city, China, which led to another significant increase in the total production capacity. At present, our production procedures includes Injection-Blowing Molding (IBM), Injection Stretching-Blowing Molding (ISBM) and Extrusion-Blowing Molding (EBM). Generally we have 150 employees, 30 sets of automatic and customized injection blowing equipment, and the annual production capacity of general containers is nearly 200 million. By 2019, we have served more than 150 customers in worldwide, and bring higher value-added to their products and brands. To provide high-quality packaging solutions and products to achieve customer brand value is what we are seeking every day and every year, with happiness and passion.

In today's world of increasingly serious environmental pollution and ecological destruction, Hanhui has also introduced a new renewable biodegradable material NatureWorks® PLA (POLYLACTIDE) in recent years, which is a fast biodegradable polymer based resin. We can use this green PLA material in almost any type of PET bottle listed in our catalog.

If you are interested in recycling materials or packagings, we can use Post-Consumer Recycling (PCR) to produce new bottles and jars to achieve your sustainable packaging goals. Hanhui only use FDA-approved post-consumption resins (PCR) that can be safely used for food and skin contact in monolayer applications. We can produce all kinds of packaging containers with up to 100% PCR content.

Our company's philosophy has remained unchanged for past 12 years.
Dedicated to the success of customers and yearn for beautiful life.

Dust-free workshop & Warehouse
无尘车间及仓库

欢迎来到汉辉塑胶制品有限公司!

我们是中国经验丰富的塑胶容器生产商，工厂位于中国深圳的坪山高新区。自2008年创建开始，我们快速地成长为PET包装容器以及吹塑模具制造的优秀企业，我们提供的包装方案和产品广泛应用于美容化妆品、酒店日化用品、医药保健品，居家清洁用品及节庆装饰礼品等行业。

凭借广泛的具有高度精密的机器和模具，我们为每一个包装项目提供优质的解决方案。我们丰富的经验是高质量产品和服务的保证，精干的团队确保了我们可以快速响应以及交货；2019年，我们还开设了位于中国惠州的第二生产基地，使我们的产能再度大幅提升。

目前，我们的生产能力包括优质的注塑吹（IBM），注塑拉伸吹塑（ISBM）和挤出吹塑（EBM），现有员工150人，各类自动及定制注吹设备三十套，年生产一般容器的能力近2亿只。至2019年，我们服务于全球的150多家客户。为他们的产品和品牌带来更高的附加值。提供优质的包装方案和产品，成就客户品牌价值，这是我们用快乐和激情每一年、每一天正在做的事情。

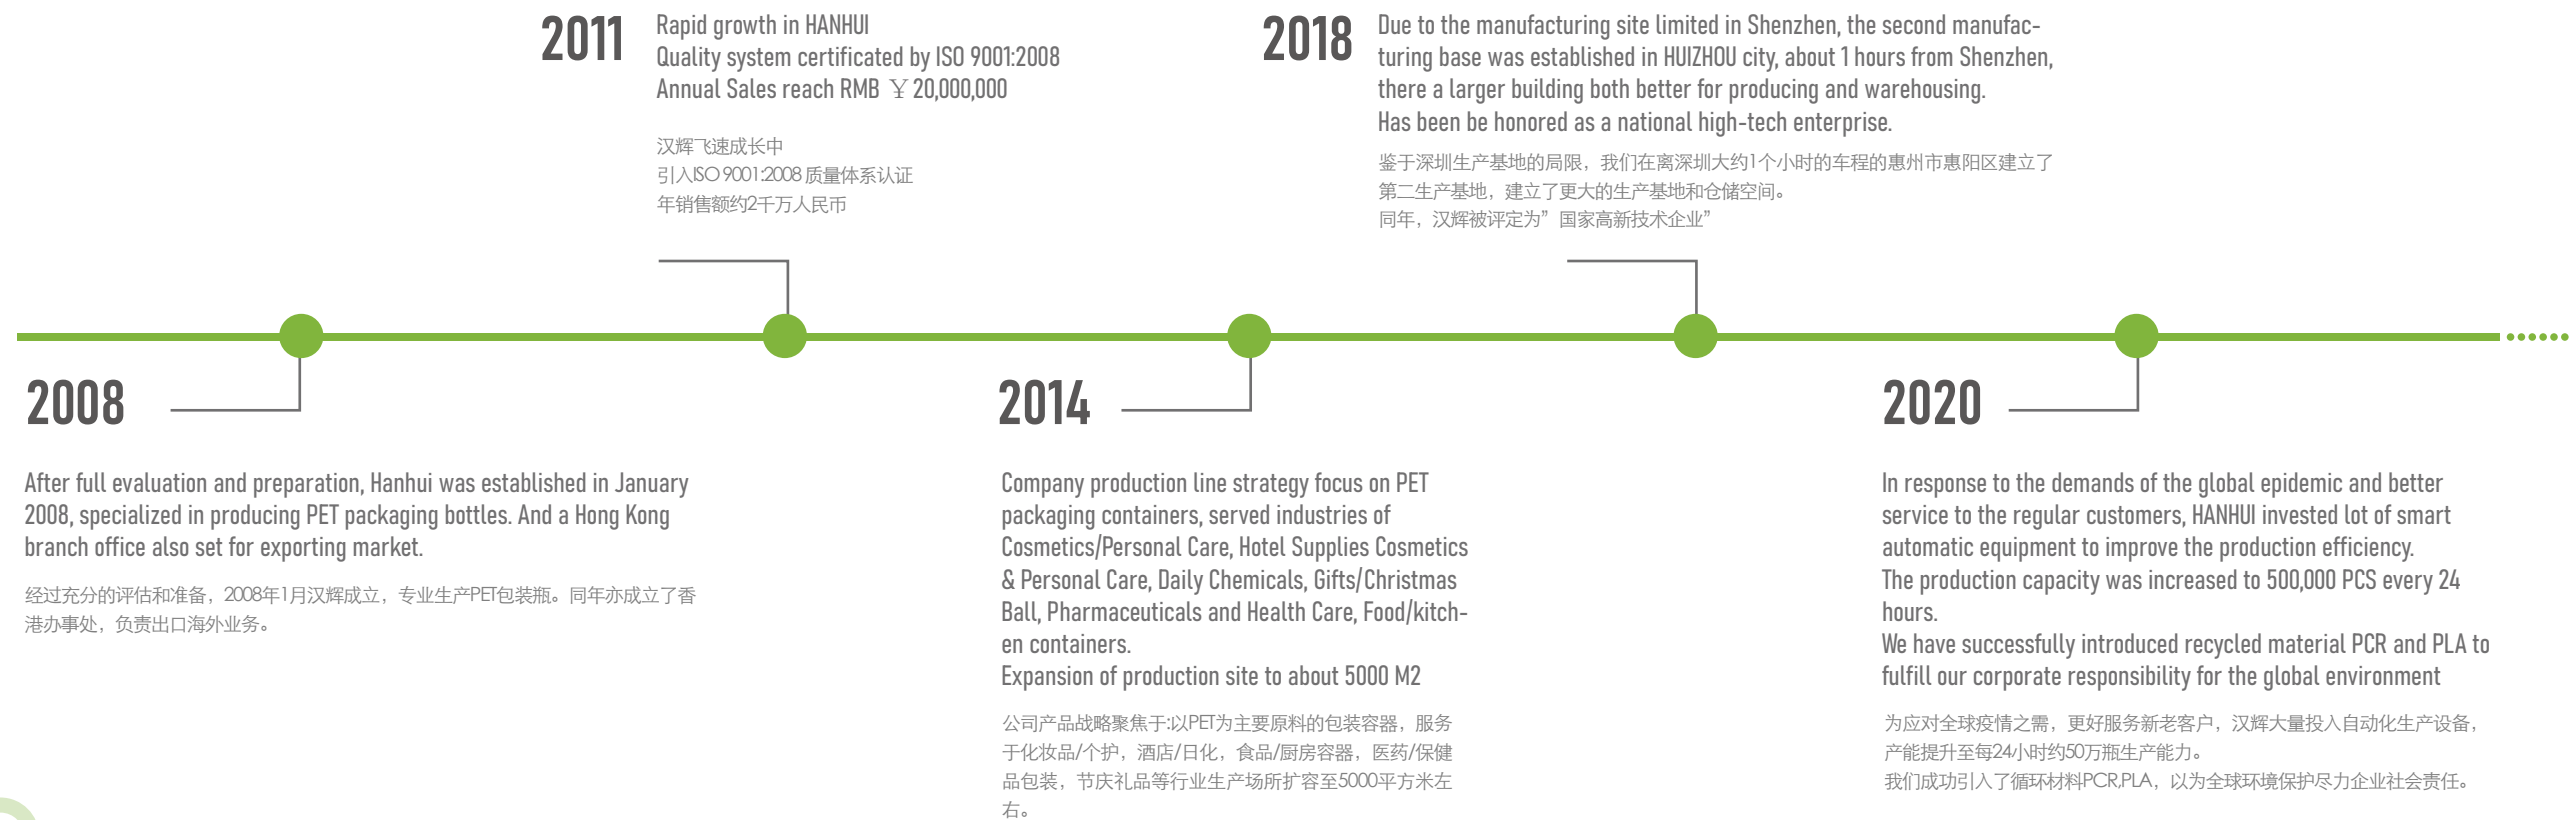

在当今世界环境污染及生态破坏日益加剧的今天，汉辉公司近年来亦引入新的可再生生物降解新材料 NatureWorks® PLA（聚丙交酯 POLYLACTIDE）来制成包装容器，这是一种可快速降解高分子生物基树脂。我们可以在本公司目录中列出的几乎任何PET瓶型中应用此绿色环保 PLA 材质。

如果您对包装回收感兴趣，我们可以将消费后树脂（PCR）再次循环制成新的瓶子和罐子，以帮助您实现可持续包装的目标。汉辉公司只使用经 FDA 批准的消费后树脂（PCR），它们可以安全地用于单层应用中的食品和皮肤的接触，我们可以生产高达 100%PCR 含量的各类包装容器。

公司的理念在十二年来一直保持不变：成就客户，向往美好！

Post Consumer Recycling
UP TO 100%

HANHUI'S PCR UP TO 100%

Customers can increase the levels of PCR in their packaging to percentage levels from 10% up to 100%

Increasing the level of provides an even greater sustainable solution for customers looking to embrace the circular benefits of recycled content in their product packaging. There are hardly any noticeable differences with slight 10%PCR. However, increasing levels beyond that percentage may result in some color variations from batch to batch. This is because PCR originates from discarded

HANHUI's Technical Department have general suggestion that -
Percentage $\leq 30\%$ is proper for clear bottle;
Percentage $\leq 50\%$ is proper for semi-transparent colored bottle;
Percentage up to 100% is ok for solid color bottle or the bottles need to be painted/labelled.

结合原料成型的表面效果，汉辉工程技术部门建议：

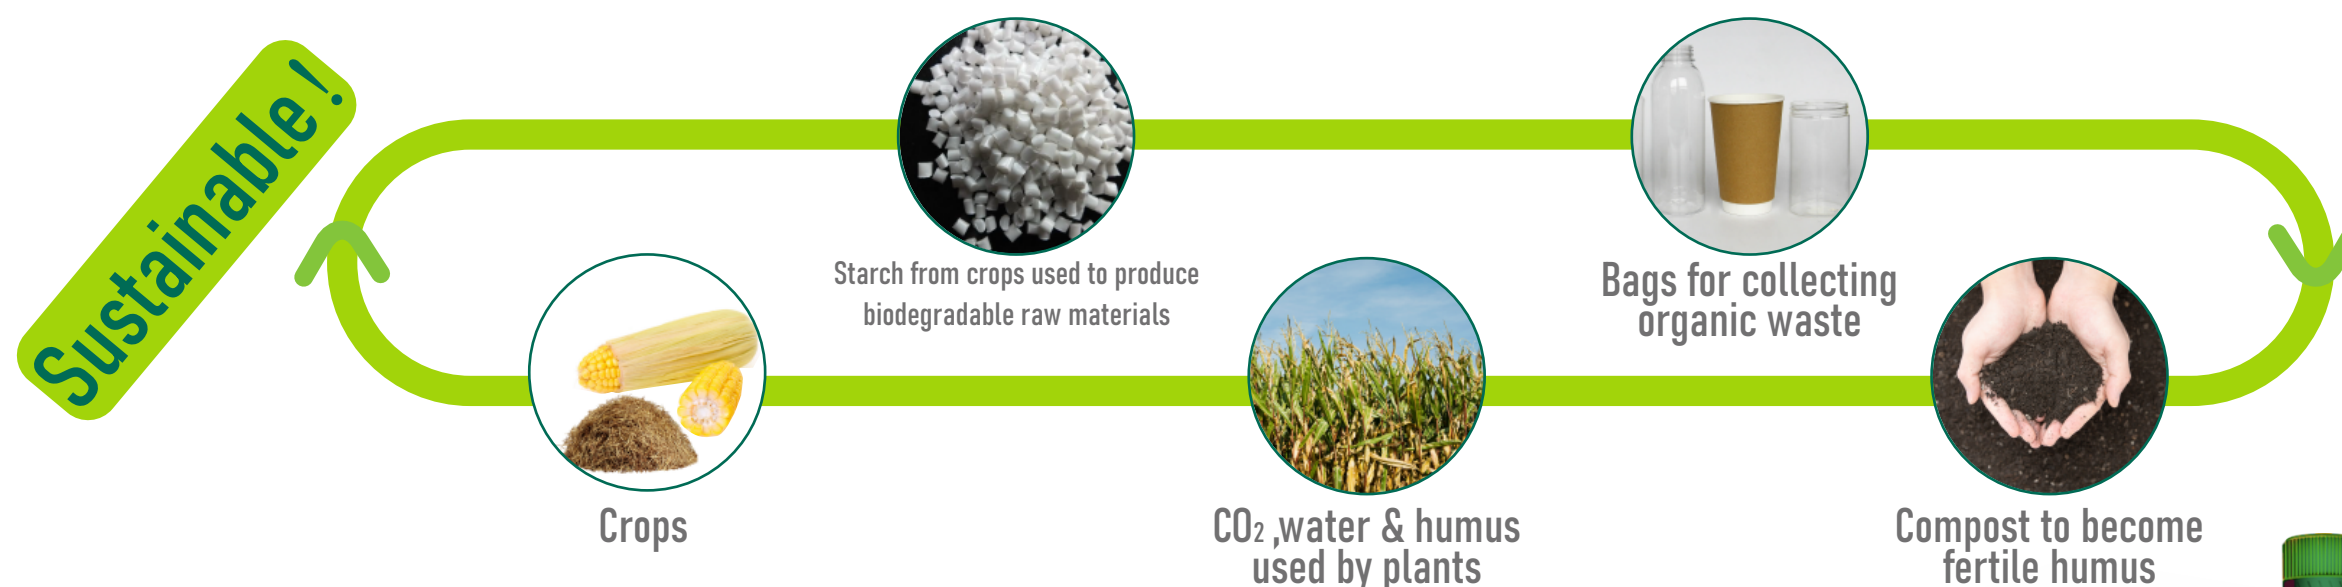

- 1/透明瓶建议添加比例小于等于30%;
- 2/半透明颜色瓶建议添加比例小于等于50%;
- 3/实体颜色瓶可添加10%-100%任意比例。

PLA (Poly Lactic Acid)

PLA is a plastic substitute that's made from fermented plant starch -- very often corn -- mainly sugar cane elsewhere in the world. Such as corn starch cassava roots, chips or starch or sugarcane (in the rest of the world). PLA is a relatively new and innovative biopolymer and significant further reductions in the environmental footprint can be relatively easily achieved through improvements in the sugarcane farming, efficiency increases in the various production steps and the usage of renewable energy in the conversion process. It is compostable in approximately 6-12 months .The PLA bottles are freezer-safe. "It is likely that in 10 years from now the cradle-to-gate GWP for PLA will have been reduced from plus 500 to minus 900 gram CO/kg PLA.

The PLA Bottles are exactly what companies need to revolutionize their industry, lower carbon footprint and provide customers with an environmentally safe option! Consumers are getting more environmentally aware, what will boost company' s profile and marketing efforts by choosing a packaging choice that is safer for both people and the environment. PLA Bottles are perfect for...

- Airports and Airlines.
- Army units
- Large sporting events
- Concerts and other musical events
- Festivals
- Your company' s cafeteria
- Any government buildings and locations
- Any other organization, or operation that wants to help build a better world
